

ABSTRAK

Pemerintah Desa Hililaza Kecamatan Lahusa saat ini menyadari pentingnya memiliki sistem informasi untuk peningkatan kinerja dan pelayanan pemerintahan yang baik yang disajikan melalui sistem informasi berbasis web. Namun, Desa Hililaza belum memiliki sistem informasi dalam mendukung pemerintahan atau masih bersifat konvensional. Berdasarkan hasil wawancara terhadap Kepala Desa Hililaza menyatakan bahwa selama menjalankan penyelenggaraan pemerintahan terdapat hambatan dan masalah yaitu informasi kegiatan pemerintahan desa dan dokumentasi setiap kegiatan di desa masih belum terkomputerisasi dengan media internet sehingga masyarakat sulit dalam mendapatkan informasi pengumuman atau berita kegiatan di desa. Maka dibutuhkan suatu sistem yang diharapkan dapat menggali potensi-potensi yang ada pada desa hililaza sehingga dapat memberikan kemudahan ke pada masyarakat dalam mencari data dan informasi seputar desa hililaza, dengan adanya sistem yang dapat mengolah informasi tentang desa seperti profile desa meliputi sambutan, sejarah, struktur organisasi, perangkat desa dan visi misi desa, dan informasi direktori meliputi peraturan, berita, daftar kegiatan, potensi, galeri yang diharapkan dapat meningkatkan pelayanannya kepada masyarakat.

Kata Kunci : Informasi desa, pengumuman, Web

ABSTRACT

The Hililaza Village Government, Lahusa District is currently aware of the importance of having an information system for improving performance and good government services that are presented through a web-based information system. However, Hililaza Village does not yet have an information system to support the government or is still conventional. Based on the results of interviews with the Village Head of Hililaza, he stated that during the administration of government there were obstacles and problems, namely information on village government activities and documentation of every activity in the village that was still not computerized with internet media so that people had difficulty in getting information on announcements or news of activities in the village. So we need a system that is expected to be able to explore the potentials that exist in the village of hililaza so that it can provide convenience to the community in finding data and information about the village of hililaza, with a system that can process information about the village such as the village profile including welcome, history, structure organization, village apparatus and village vision and mission, and directory information including regulations, news, list of activities, potentials, galleries which are expected to improve their services to the community.

Keywords: *Village information, announcements, Web*
