PAUD Teacher Study Program, Faculty of Education, Sari Mutiara Indonesia University

The purpose of this study was to determine the effect of parenting style on the emotional intelligence of children aged 4-6 years. This research uses a type of research (Library Research) or literature review where research results are obtained from several previous studies. This research data uses secondary data, with miles and Huberman analysis techniques, data reduction, data display, and Conclusion Drawing / Vertificaton. The results of this study indicate that the parenting style affects the emotional intelligence of children aged 4-6 years.

Keywords: Influence of Parenting Patterns, Emotional Intelligence.
